

TOUCHSCREEN

Digital Car Operating Panel

Transform Your Home Elevator Interaction Into a Dynamic, Visual Experience

Southeast Elevator's residential elevator touchscreen car operating panel (COP) is a digital interface that allows users to easily interact with the elevator system by pressing the display screen.

Residential elevators with touchscreens offer a more modern, streamlined user experience by replacing the conventional buttons and switches found in traditional elevator controls.

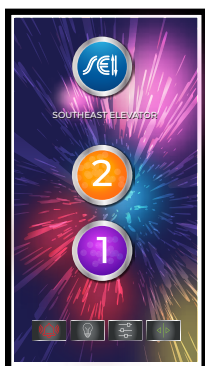

Features:

Our touchscreen COP provides an intuitive, user-friendly interface that allows you to easily control the elevator and settings.

- Floor Selection
- Door Control
- Lighting Adjustment
- Alarm
- Custom Background Images
- Power-Saving Mode
- Integrated phone dialer

Modern Residential Elevator Technology

The goal of an elevator touchscreen is to create a seamless and convenient user experience while providing increased functionality and customization options.

A touchscreen elevator COP offers a simple and convenient way to operate your home elevator within a modern and aesthetically pleasing design.
