WOODFOLD®

MATERIALS & FINISHES

Residential Accordion Elevator Doors

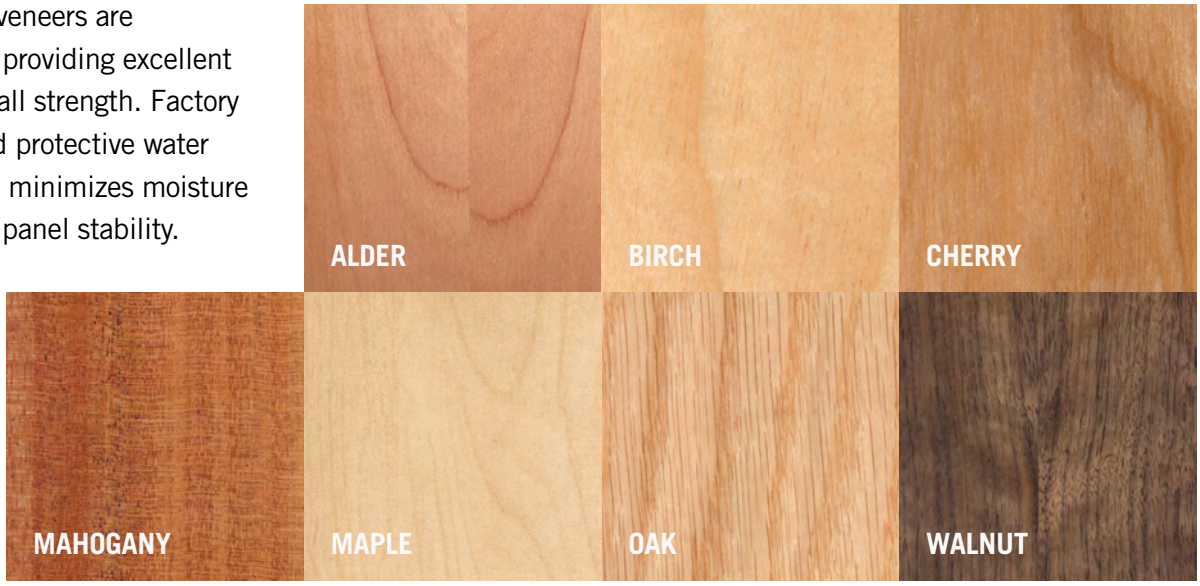
Materials & Finishes

Woodfold maintains a wide range of designer finishes to suit every taste. Each elevator door is hand assembled and tested for operation and quality in our Oregon employee-owned facility. The Woodfold team maintains the highest standards in every aspect of manufacture and assembly.

VENEER
Natural Hardwood

Select grade hardwood veneers are laminated to 1/4" MDF providing excellent providing excellent overall strength. Factory finishing with sealer and protective water based lacquer top-coats minimizes moisture retention and increases panel stability.

Custom stain finishes and exotic or special hardwoods available with additional lead time.



VINYL LAMINATE
Woodgrain

Woodgrain finishes provide an elegant, realistic appearance with added durability at a great value. Finishes are laminated to 1/4" MDF board providing excellent visual appeal.

Colors may vary. Please contact Customer Service should you need a sample.

VINYL LAMINATE

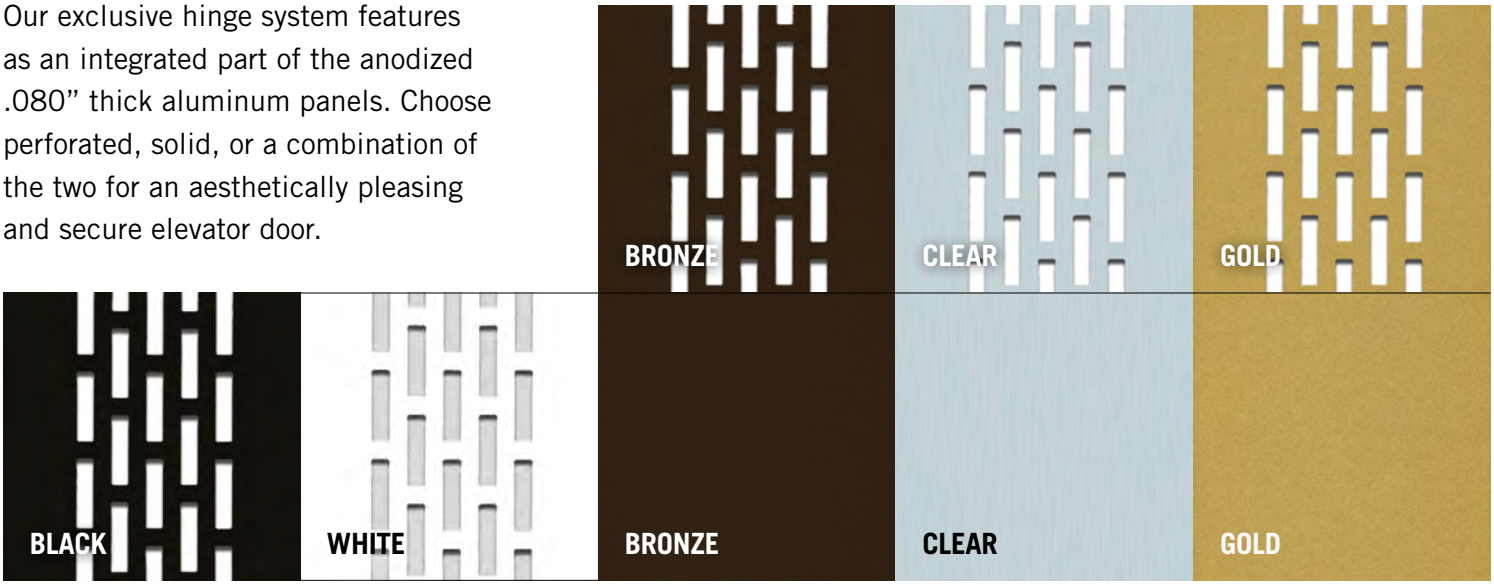
Color & Texture

All are laminated to a 1/4” MDF board providing excellent dimensional uniformity. The textured designs have a raised three dimensional finish.

ALUMINUM

Solid & Perforated

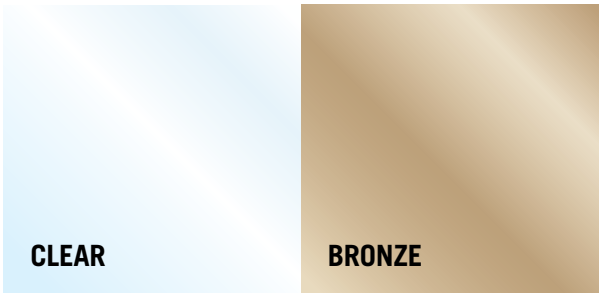
Our exclusive hinge system features as an integrated part of the anodized .080” thick aluminum panels. Choose perforated, solid, or a combination of the two for an aesthetically pleasing and secure elevator door.



ACRYLIC

Vision Panels

Vision panels utilize a .118” thick, transparent clear or bronze acrylic pane. Custom panel options are also available. We use only ‘Plexiglas’ branded acrylic safety glazing conforming to ANSI Z-97 1-1984 and 16CPSC-FR1201 standards.



Safe, strong, and space saving

Woodfold's residential elevator door satisfies the strength and deflection requirements of ASME 17.1-2016/CSA B44-16 and the Florida Building Code. (U.S. Patent D792,190 and U.S. Patent 9,879,471)

AMERICAN MADE IN OREGON BY EMPLOYEE OWNERS
